# **Innovative Energy Management Workshop For Water and Wastewater Treatment Utilities**

**Tuesday, October 14, 2008, 8:30 a.m. – 4:00 p.m.**

**The Downtown Doubletree Nashville  
315 4<sup>th</sup> Avenue North  
Nashville, Tennessee**

## **The workshop will help utilities LEARN HOW TO:**

- Develop **energy management programs**
- Prioritize energy improvement
- Set measurable energy goals to reduce consumption
- Manage energy to reduce operating costs
- Establish a plan to follow through on priority energy management goals

## **Follow-up:**

- On-site technical support with pilot utilities
- Energy Star Bench-marking assistance
- Follow-up information session

## **The Workshop will include:**

- Interactive instruction on using **MANAGEMENT SYSTEMS APPROACHES** to reduce energy use
- Opportunity to learn from experienced utility representatives on energy performance improvements and associated cost savings
- Identifying follow-up opportunities for utilities taking action

## **Food & Space Provided by the Following Supporters:**

“Rising energy costs can be a major challenge for water utilities. The good news is that there are many opportunities to save money and help the environment by focusing on energy-saving techniques.

*James I. Palmer, Region 4 Administrator, U.S. Environmental Protection Agency*
